Mr. dmrhg  
I tried what you described, but session was locked everytime... or I was not quick enough to catch....!

Here is a video I took on my phone, computer is suspended/closed, when i open the computer the desktop is shown before the locking screen loads.  
As I mentioned before, I had Arch with gnome and the login window is not the same as the one i get when using Antergos, also I have it seems like there is a bug with the
